The New Fast-Lock-System

Swift:

- 40 % time reduction for the plug and lock action when installing the wiring

Safe:

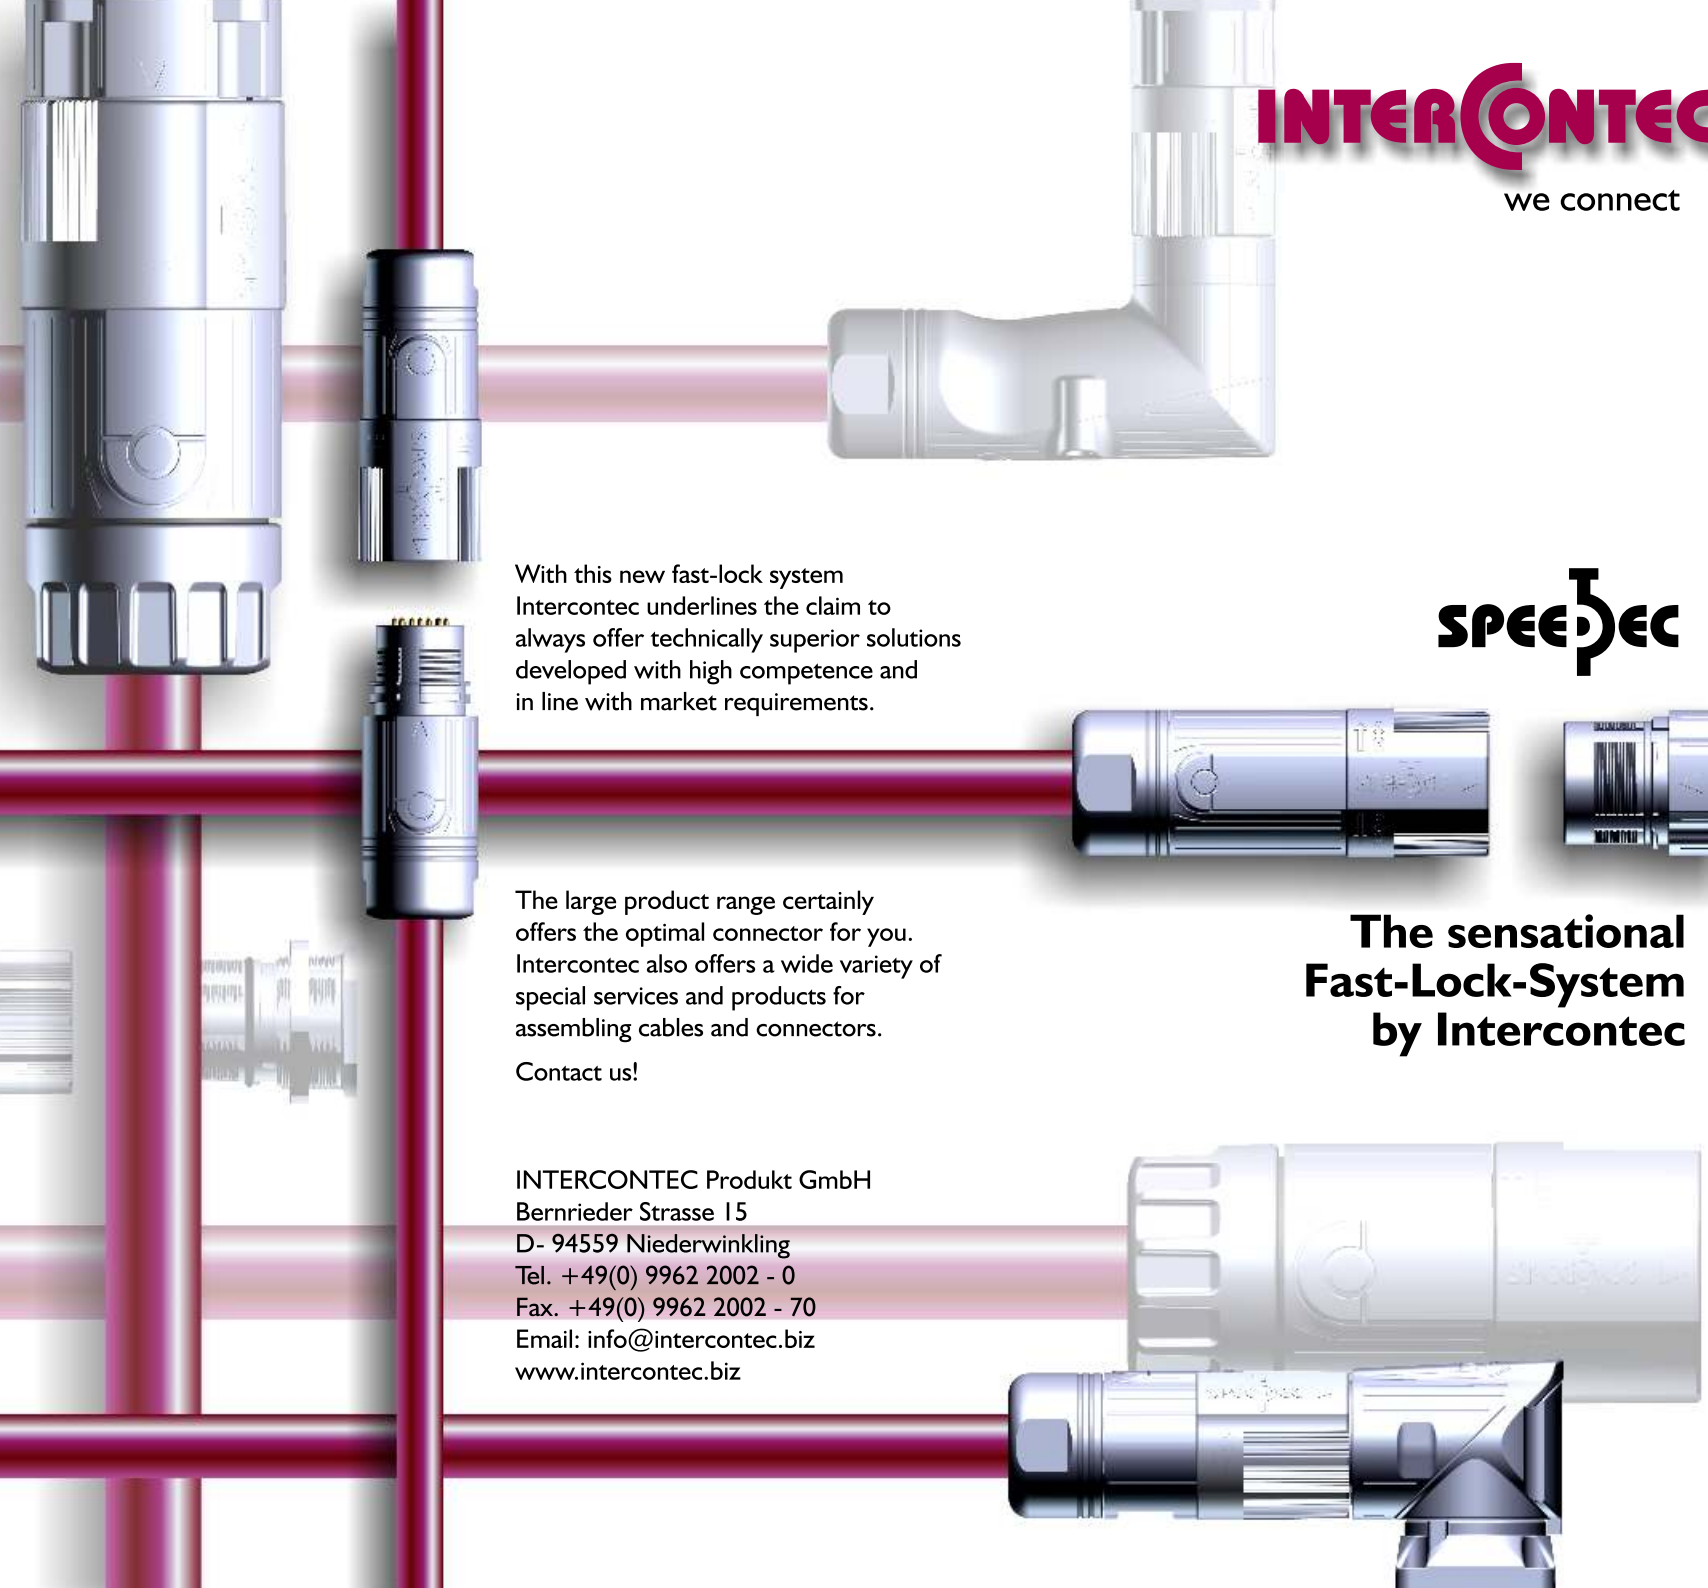

- Obvious and easy handling
- Vibration-resistant due to integrated restraint
- No mix up of signal and power connector due to explicit coding
- Lock shock proof up to 50g

Compatible:

- Standard cap nut fits on thread of socket and couplings with the SpeedTEC System
- Available in numerous different proven housing versions
- Housings in sizes M17, M23, M40 can be modularly equipped with all current insulating bodies, pin numbers and pin types

The background of the advertisement features a grid of red lines. Various Speedtec connector components are shown, including a large vertical connector on the left, a smaller vertical one in the center, and several horizontal and angled connectors on the right. The components are metallic and have a textured surface.

With this new fast-lock system Intercontec underlines the claim to always offer technically superior solutions developed with high competence and in line with market requirements.

The large product range certainly offers the optimal connector for you. Intercontec also offers a wide variety of special services and products for assembling cables and connectors.

SPEEDTEC

The New Fast-Lock-System

Swift:

Our new fast lock system SpeedTEC helps you to minimise connecting times drastically. No matter whether you want to install big facilities or work on complex wirings in narrow control cabinets - the quick and safe handling will always be a benefit to the job at hand!

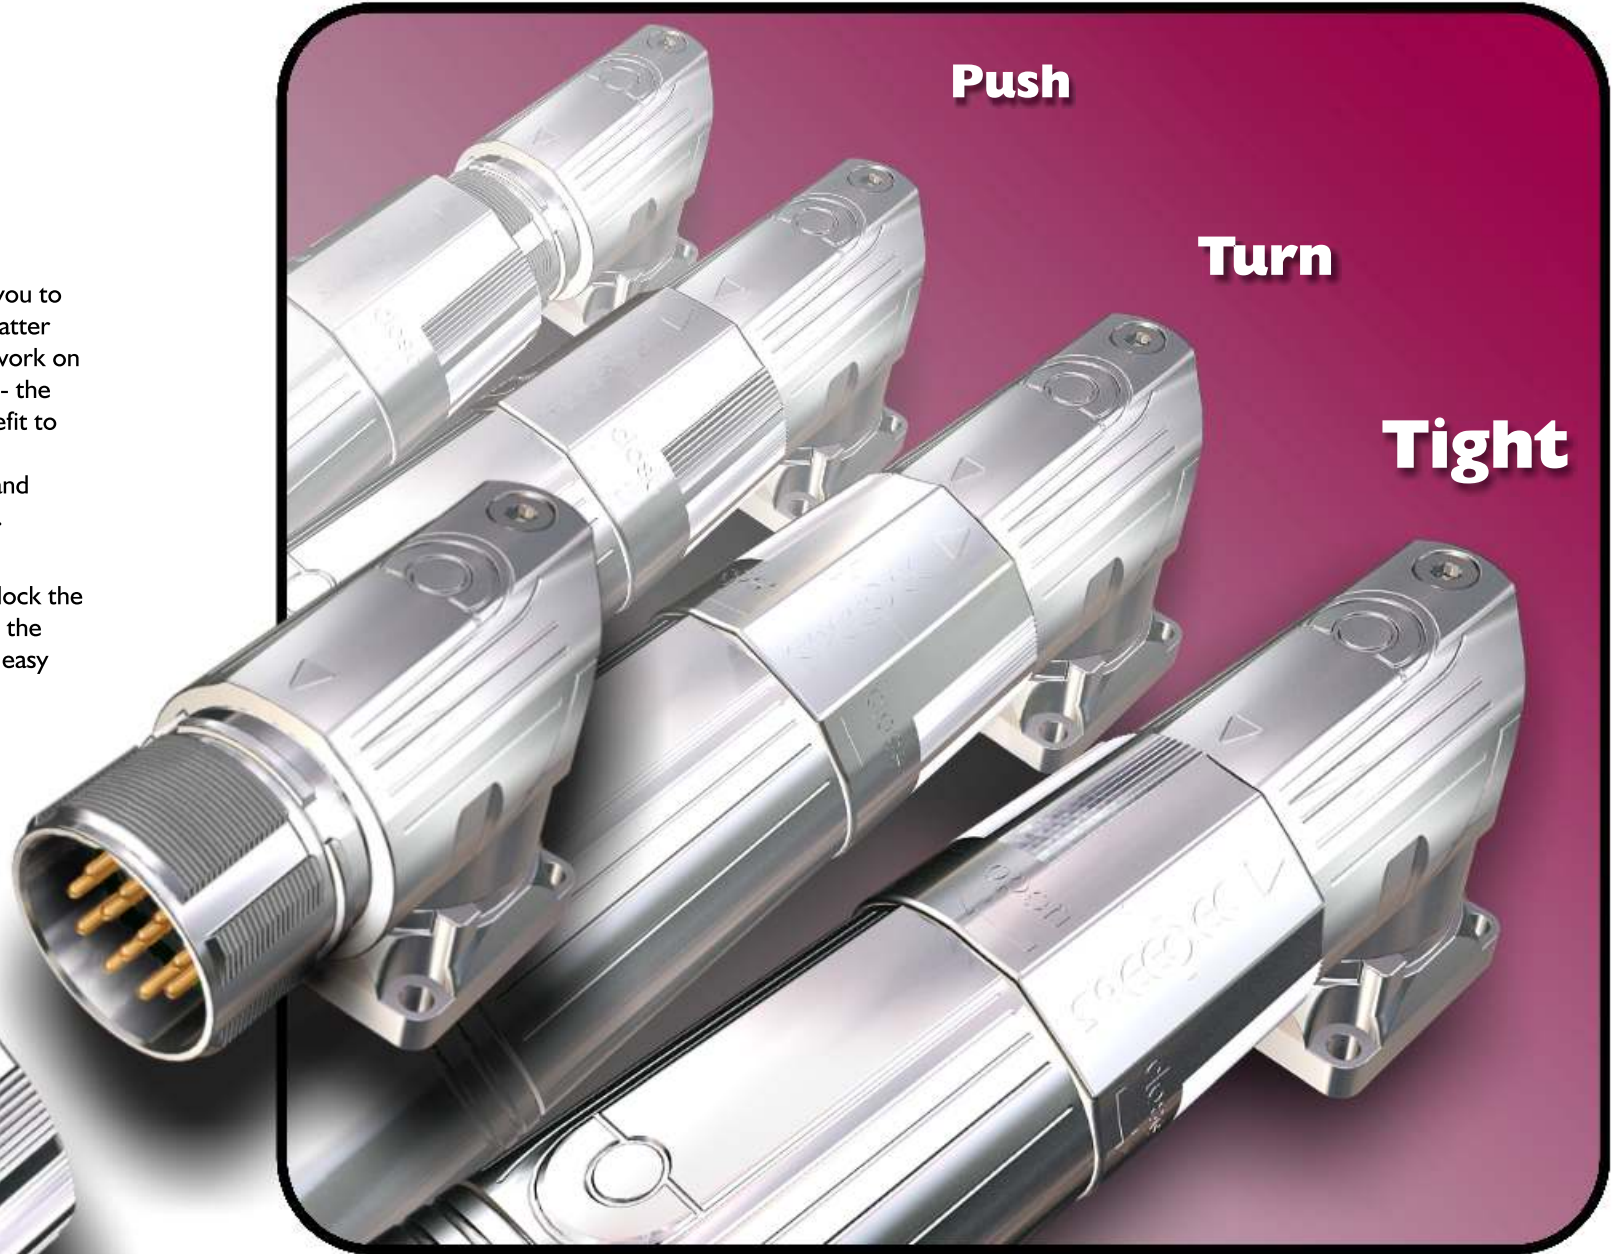

No more tedious turning round and round and regripping - all you need now is a slight turn.

Safe:

Now it is simple even with limited room to lock the connector safe and stable. Due to the shape the orientation is intuitive. And the slight turn is easy even in tightest spaces.

Compatible:

you can easily connect new components equipped with SpeedTEC sockets and couplings to your existing connectors, because the SpeedTEC lock is compatible with standard cap nuts.

The new SpeedTEC fast lock system by INTERCONTEC will help you save time and costs in assembly.

The new SpeedTEC Fast-Lock-System by INTERCONTEC is a real High-End-Solution!
